February 1, 2024

Dear Mr. REISER,

Thank you very much for your thoughtful and long reply to my query. I published it to the best of my ability online. Although I emailed it to the LKML (Linux Kernel Mailing List), it received no replies there. However, many pages and pages of replies were received on Reddit's `r/linux` subreddit and on the website Hacker News<sup>1</sup>.

I am very grateful for your time and effort in replying to me. I am also very grateful for the time and effort you put into the development of the ReiserFS filesystem. I am very sorry for the circumstances that led to your incarceration. I hope that you are able to find some peace and happiness in your life, and that you are able to continue to contribute to the world in a positive way.

I have attached a copy of the letter I sent to the LKML, so you can see how I formatted your letter. I have attached as well a copy of the replies I received on Reddit and Hacker News. I hope you find them interesting.

I have also made an attempt to attach information related to Reiser v5, but there is not much information about it online.

If there is some way I can help next time your case comes up for parole, please let me know. I would be happy to write a letter of support for you, or to help in any other way I can.

Sincerely,

Fredrick R. BRENNAN
